

Curriculum Vitae

Personal Information

Name: Debit Katuwal

Age: 20

Completed 12th Grade

Experience

1 Year of Experience as Full Stack Developer

Technologies: MERN Stack, Node.js, FastAPI, Django

Achievements & Contributions

- Contributed to developing and launching multiple full-stack applications, focusing on user-friendly design and scalable architecture.
- Collaborated in cross-functional teams to deliver projects on time, ensuring performance optimization and efficient codebase management.
- Successfully integrated RESTful APIs and worked with database management systems to build dynamic, real-time applications.
- Continuously improve skills through self-learning and hands-on practice, adapting to new technologies in the rapidly evolving software development field.

Summary

A passionate Full Stack Developer with a year of experience and a deep interest in solving real-world problems with technology. I have worked on building dynamic web applications using technologies like MERN stack, Node.js, and FastAPI. My goal is to use my skills to build innovative

solutions and continue growing within the tech field.

With a strong foundation in both front-end and back-end development, I am constantly eager to learn and improve my knowledge in every aspect of software development.
